Purpose

This notice is to inform you that the California Energy Commission staff will hold a staff workshop to discuss the proposed Quail Brush Generation Project (QBGP). The purpose of the workshop is to provide a public forum for staff, the project applicant, intervenors, members of the public and agencies interested in the proposed project to discuss substantive issues related to the QBGP Application for Certification (11-AFC-3). The specific technical areas that will be discussed are: biological resources, fire protection, noise, soil & water resources and visual resources.

Additionally, the workshop will provide a forum for members of the public to comment on or ask questions about the proposed QBGP and staff's ongoing environmental review of the project, especially comments or questions related to the technical areas listed above, since technical experts in other areas will not participate in the workshop. All interested parties, interested agencies and members of the public are invited to participate.

Public comments and questions will be accepted at 6 p.m. Additional opportunities for public comment may be provided at other times during the workshop as the parties work through the scheduled topics. The workshop will end after the comment period

scheduled for 6 p.m. and after the parties complete their discussions of the five identified technical areas.

Attendance by the Energy Commission's Public Adviser's Office

The Energy Commission's Public Adviser's Office will have a representative attend the workshop and will be available to address any questions regarding opportunities for public involvement in the Energy Commission's project review process.

The Commissioners of the Energy Commission are the decision makers with authority to approve, modify or deny the proposed project. Two members of the Commission, Commissioners Douglas and McAllister, are assigned to the designated Committee for this project. Other than the initial Informational Hearing and Site Visit, normally the Committee members do not attend staff workshops but rather preside over evidentiary hearings and status conferences. It is unlikely that any Commissioners will attend this public workshop.

However, staff is an independent party to this proceeding and has a key role in conducting the environmental review of the Application for Certification (11-AFC-3) and subsequently providing staff's recommendation to the Commission on whether to approve, modify or deny the AFC.

Remote Attendance

Those who prefer to participate in the workshop remotely rather than in person may join by computer or telephone through the following instructions:

Computer Log-on:

1. Please go to <https://energy.webex.com> and enter the unique meeting number: **926 819 370**.
